Forecast for Sunday 18 Aug 2024

Weather: The chance of a few light showers during the early hours of Sunday and into the first part of the morning. Otherwise a dry day with periods of cloudy sky interspersed with periods of sunshine. Generally a brighter afternoon is expected compared to Saturday.

Chance of cloud-free hill tops above 600m: 90% but 60% west until mid-morning.

Low cloud and visibility: Periods of cloud above 500-600m developing during the early hours and then clearing by mid-morning, this mostly in the west. Within this cloud, visibility will be poor but otherwise very good visibility with far-reaching views. Locally poor visibility at all levels in any brief showers first thing.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Meteorologist's View

Sunday is expected to be a bit sunnier than on Saturday and with high UV levels during the midday hours, sun protection is advised. Despite a brisk breeze on the summits, it will be a fine day for hill walking, with excellent views of distant hills and mountains, especially from mid-morning onwards.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
14:00 on Sat 17 Aug 2024	0.2mm	6.6mm	7.8mm

Forecast for Monday 19 Aug 2024

Weather: Some sunshine in the east to begin the day, but cloud building from the west through the morning and thereafter a fairly cloudy day with an increasing chance of rain. The rain may be showery in nature at first, but more prolonged periods of heavy rain are possible by the evening. A bit of uncertainty in terms of the rain arrival time and it is possible that most of the afternoon will be dry and bright with hazy sunshine and the rain holds off until around dusk.

Maximum wind: Southwesterly 30-40 mph developing, possible gusts of 45-50 mph by the evening.

Chance of cloud-free hill tops above 600m: 90% falling to 60% by the evening.

Low cloud and visibility: Periods of cloud above 700m developing in association with any rain, this perhaps becoming extensive and persistent by the evening.

Temperature: **Valleys:** Plus 8 Celsius rising to plus 21 Celsius.
At 600m: Plus 11 Celsius rising to plus 15 Celsius.
Freezing level: Well above the summits.
